Subjective-TRSA Practice

Chief Complaint

Patient type: Established

Chief Complaint: colonoscopy consult

Primary Care Physician

William G. Tucker, DO

Additional complaints

Pt here for screening colonoscopy. Last scope was 2015. No family hx. No hx of polyps.

History of Present Illness

Problem 1:

Patient is a 75-year-old female who presents to the office for routine colonoscopy screening. Her last colonoscopy screening was in 2015 with Dr. Romines and this was noted to be normal. Denies family history of colon cancer. Denies any rectal bleeding, changes in bowel habits, or unintentional weight loss.

Screening Colonoscopy

Prior Colonoscopy: Yes (2015 with Dr. Romines)

Hx of polyps?: No

Family hx of Colon CA?: No

Pain Scale

Pain rating :

Pain score: 0

Pain scale used: 0-10 numeric scale

OP Notes

TAYLOR REGIONAL HOSPITAL

Operative Report-Outpatient

Name: BURTON, JANET ELAINE
MR#: M000021358
Acct#: V00003777980
Date of Birth: 06/09/1950
Date of Service: 07/24/15
Practitioner: ROBERT B. ROMINES, M.D.

PREOPERATIVE DIAGNOSIS: Screening colonoscopy.

POSTOPERATIVE DIAGNOSIS: Screening colonoscopy.

PROCEDURE: Colonoscopy to the cecum.

SURGEON: Dr. Robert Romines, M.D.

ANESTHESIA: Frazier.

ESTIMATED BLOOD LOSS: Minimal or none.

COMPLICATIONS: None apparent.

Name: BURTON, JANET ELAINE
MR#: M000021358
Date of Birth: 06/09/1950
Date of Service: 09/05/25
Practitioner: JAMES T. BERGIN, M.D.

DESCRIPTION OF PROCEDURE: The patient was brought to the endoscopy suite and received IV sedation. The anus was dilated with a lubricated digit. The colonoscope was introduced and under direct vision with the Olympus colonoscope using the C-arm, we were able to advance the scope down into the ileocecal valve where the appendiceal orifice was visualized as was the crow's foot. The scope was then slowly withdrawn. The only pertinent findings were a few small mouth diverticula, relatively nominal in number, primarily within the sigmoid colon. The remainder of her endoscopy was unremarkable. Based on the fact that this was a screening examination, she had no polyps or pathologic lesions, she does not need another colonoscopy for 10 years since there is no family history or p.r.n. symptomatology.

Thank you for us to participate in her care.
