### Operative Note

#### Operative Note

Provider: William Tucker

Preop diagnosis: Colon cancer screening

Postop diagnosis: Internal/external hemorrhoids

Procedure: Colonoscopy

Surgeon James Bergin, MD

Assistant: Cox

Anesthesia: TIVA

Anesthesia provider: Bland

Boston bowel prep score: 3+3+3 = 9

Complications: None

Withdrawal time: 7 minutes

Screening recommendations: Patient should undergo screening colonoscopy in 10 years if she has no personal history colonic polyps nor family history colon cancer

#### Findings:

1. Noninflamed internal and external hemorrhoids

#### Operative Note:

After informed consent was obtained, patient was brought back to the endoscopy suite. Patient was positioned lateral decubitus position anesthesia was administered without complication. Digital rectal exam revealed noninflamed external hemorrhoids. Scope was advanced to the cecum without difficulty. Cecum was intubated ileocecal valve and appendiceal orifice were identified. Scope was withdrawn. No abnormalities were noted throughout the entirety of the colon. Scope was then brought down into the rectum and retroflexed revealing noninflamed internal. Scope was withdrawn. Patient tolerated procedure well was stable to recovery.
